TROPICAL CYCLONE BULLETIN NR. 30 Super Typhoon GORING (SAOLA)

Issued at 8:00 AM, 30 August 2023

Valid for broadcast until the next bulletin at 11:00 AM today.

SUPER TYPHOON GORING LEAVES THE BALINTANG CHANNEL AND IS NOW HEADING TOWARDS THE NORTHERN PORTION OF THE WEST PHILIPPINE SEA

Location of Center (7:00 AM)

The center of the eye of Super Typhoon GORING was estimated based on all available data at 90 km West Southwest of Basco, Batanes (20.1°N, 121.2°E)

Intensity

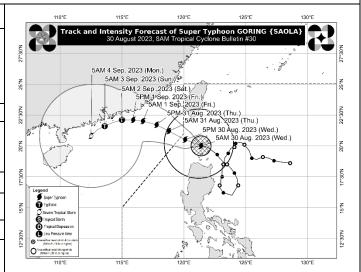

Maximum sustained winds of 195 km/h near the center, gustiness of up to 240 km/h, and central pressure of 920 hPa

Present Movement

West Northwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 340 km from the center

TRACK AND INTENSITY FORECAST

			Center Position	Inter	sity	Movement

TROPICAL CYCLONE BULLETIN NR. 30 Super Typhoon GORING (SAOLA)

Issued at 8:00 AM, 30 August 2023

Valid for broadcast until the next bulletin at 11:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT								
TCWS No.	Luzon	Visayas	Mindanao					
3	Batanes and the northern and western portions of Babuyan Islands (Babuyan Is., Calayan Is., and Dalupiri Is.)	-	-					
Wind threat: Storm-force winds	Warning lead time: 18 hours Range of wind speeds: 89 to 117 km/h (Beaufort 10 to 11) Potential impacts of winds: Moderate to significant threat to life and property							
Wind threat: Gale-force winds	The rest of Babuyan Islands, the northern portion of Ilocos Norte (Pagudpud, Adams, Bangui, Dumalneg, Burgos), and the extreme northwestern portion of mainland Cagayan (Santa Praxedes, Sanchez-Mira, Claveria, Pamplona, Abulug)	-	-					
	Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property							
Wind threat: Strong winds	The northern and central portions of Cagayan (Solana, Tuao, Iguig, Amulung, Santo Niño, Piat, Rizal, Lasam, Gattaran, Santa Ana, Gonzaga, Lal-Lo, Santa Teresita, Buguey, Baggao, Alcala, Camalaniugan, Aparri, Allacapan, Ballesteros), Apayao, the northern portion of Kalinga (Balbalan, Pinukpuk), the northern portion of Abra (Tineg, Lagayan, Lacub, Malibcong, San Juan, Danglas, La Paz, Dolores, Bangued, Lagangilang, Licuan-Baay), the rest of Ilocos Norte, and the extreme northern portion of Ilocos Sur (Sinait, Cabugao, San Juan, Magsingal)	-	-					
willus .	Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property							

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

Forecast accumulated rainfall for today

- Greater than 200 mm: The southern portion of Batanes and the northwestern portions of Babuyan Islands
- 100-200 mm: Ilocos Norte, the northern portion of Apayao, the extreme northwestern portion of mainland Cagayan, and the rest of Batanes and Babuyan Islands
- 50-100 mm: Ilocos Sur, Abra, the northwestern portion of mainland Cagayan, and the rest of Apayao

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and raininduced landslides are expected especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

The **enhanced Southwest Monsoon** will also bring occasional or monsoon rains over the western portions of Luzon, and Visayas over the next three days. For more information, refer to **Weather Advisory #11 for Southwest Monsoon** issued at 11:00 PM yesterday and **24-Hour Public Weather Forecast and Outlook** at 4:00 AM today.

MMSS-04 Rev. 0 / 15-08-2023

TROPICAL CYCLONE BULLETIN NR. 30 Super Typhoon GORING (SAOLA)

Issued at 8:00 AM, 30 August 2023 Valid for broadcast until the next bulletin at 11:00 AM today.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Violent, life-threatening conditions from typhoon-force winds are possible within any of the areas where Wind Signals No. 4 is hoisted, resulting in significant to severe impacts.
- Moderate to significant impacts from storm-force winds are possible within any of the areas where Wind Signal No. 3 is hoisted.
- Minor to moderate impacts from gale-force winds are possible within any of the areas under Wind Signal No. 2
- Minimal to minor impacts from strong winds are also possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon will continue to bring **gusty conditions** over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Today: Ilocos Region, Cordillera Administrative Region, Zambales, Bataan, Bulacan, Aurora, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas
- Tomorrow and on Friday: Ilocos Region, Cordillera Administrative Region, Zambales, Bataan, Bulacan, Pampanga, Aurora, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, and Western Visayas

Coastal Inundation

There is a **moderate to high risk of storm surge** which may cause **flooding in the low-lying and exposed coastal areas** of Batanes and the northern and western portions of Babuyan Islands

HAZARDS AFFECTING COASTAL WATERS

A **Gale Warning is in effect** for most seaboards of Luzon and Visayas, and the eastern seaboard of Mindanao. Disruption in civilian maritime activities is expected over these areas (e.g., suspension of sea travel) due to hazardous sea condition. For more information, refer to **Gale Warning #13** issued at 5:00 AM today.

TRACK AND INTENSITY OUTLOOK

- GORING is forecast to follow a mainly northwestward or west northwestward path across the Luzon Strait from today until it exits the Philippine Area of Responsibility (PAR) tonight or tomorrow morning. GORING will likely remain as a super typhoon until Friday.
- Outside the PAR region, GORING will continue its west northwestward movement for the remainder of tomorrow before turning more westward on Friday (while slowing down), then west southwestward on Sunday (e.g., moving nearly parallel to the coast of Guangdong, China, although a landfall over the mainland China area on Sunday is not ruled out). Increasingly unfavorable conditions over the waters off the coast of Guangdong will trigger a weakening trend and by Monday, GORING will have weakened into a severe tropical storm.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 AM today.
